Deploy, Manage & Optimize Printers for any Virtual Desktop

Discover ezeep's professional printing solution for Microsoft Azure Virtual Desktop, Windows 365 Cloud PC, VMware Horizon, Citrix Virtual Apps and more

Printing has always been a critical point in the deployment of virtual desktops. While printing often still works in the PoC phase, the benefits of a professional print management become apparent at the latest during rollout. ezeep Blue was developed together with Microsoft, and only with ezeep Blue is it possible to ensure an optimal user experience with virtual desktops in the long run.

As a SaaS (Software as Service) solution, ezeep Blue is ready to use in just a few minutes. A connector for Windows or our innovative ezeep Hub provides the printers centrally without the need to manage drivers on the endpoint. Agents for the desktops add local printers to the users' virtual desktop seamlessly.

The advantages in detail:

Secure

- ✓ Ideal for zero trust environments
- ✓ No printers with direct internet connection
- ✓ No incoming connections
- ✓ Pull printing prevents printouts from landing in the wrong hands
- ✓ With TLS 1.2 encrypted
- ✓ Azure AD/AAD with Multi-Factor Authentication

Best user experience

- ✓ Up to 5x faster printing
- ✓ Shortest time to first page output
- ✓ A consistent print path, whether using a remote desktop app or the HTML browser.
- ✓ Special printers, in particular label printers, can be supported
- ✓ Self-service printer selection in My Printers

Simplest administration

- ✓ Installation in minutes
- ✓ No VPN needed
- ✓ Clear and simple web portal
- ✓ Integration of existing print servers or replacement with ezeep Hub
- ✓ New printers and replacement of existing printers with a few clicks
- ✓ Full Azure AD integration, no duplicate user management
- ✓ Easy to purchase via Azure Marketplace.

Say no to printer drivers on the virtual desktop or end device

- ✓ Simplified maintenance of desktop images
- ✓ Faster login due to smaller user profiles
- ✓ No more driver tests necessary

Optimized for Virtual Desktops

- ✓ Agents for dynamically connecting local printers for PC, Mac and IGEL
- ✓ Support for IGEL OS with AVD integration
- ✓ Session printing also for iPhone and Android
- ✓ No need to manage printing on endpoints

Fair and easy licensing

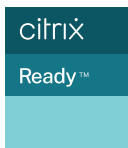

ezeep Blue pays for itself in days and protects you against surprises. ezeep Blue is also licensed purely on a named-user basis. The number of pages or print jobs do not need to be recorded, nor are they billed.

Also simplifies printing for PC, Mac, Chromebooks, smartphones and tablets

ezeep Blue optimizes all office printing for any device with an easy-to-use solution: Chromebooks, iPhones or Cloud PCs – ezeep handles them all with ease

Corporate Social Responsibility

ezeep is operated in climate neutral data centers. We offset the CO₂ impact of paper and the energy consumption of our customers' printing through our partnership with Justdiggitt, helping our customers achieve their CSR goals.
